- HCIA-Cloud Service V3.0 Course (July 2022 – August 2022)
- Solid Principles and CICD Process (May 2023)
- Getting Started with Networking (April 2023)
- Microsoft Fundamentals (April 2023)

EXPERIENCE

Capstone project, 09/2022 to 05/2023
Fish Aquarium Feeding and Water Quality Monitoring System with Android Application

- Actively developed, tested, and fine-tuned the core Arduino codebase for our capstone project, ensuring seamless integration of hardware components and achieving project objectives.
- Led the hardware integration and wiring efforts for the capstone project, ensuring precise connections and optimal functionality of all components within the Arduino-based system.
- Actively developed, tested and fine-tuned the mobile application while ensuring the smooth communication between the application, Firebase, and micro-controller.
